

## 2017 PARKING PERMITS

2017 parking permits will be available December 12<sup>th</sup> for pick-up at the Marina Operations office, and are only issued if:

1. You are the tenant of record – ID may be required.
2. You have provided the Port with a copy of your current insurance (in compliance with requirements, and More than 30 days from the expiration date).
3. You have provided the Port with a copy of your current Washington state vessel registration.
4. Your account is current.

For questions, please contact the Marina Operations office at 425-775-4588. \*2016 parking permits will be valid through January 31, 2017.

## INTERMITTENT FUEL DOCK CLOSURES IN JANUARY 2017

To better serve our customers, the Port of Edmonds is upgrading the sales transaction equipment on the fuel dock. *Check our website [www.portofedmonds.org](http://www.portofedmonds.org) for exact closure times and status of installation.* Following this upgrade, tenants who wish to use pay-at-the-pump services and receive related discounts will need to schedule a time with Port operations to:

1. Sign a new fuel card agreement
2. Provide credit card info to charge your fuel
3. Receive training on the new system and a new transaction card.

Training will start following installation. We appreciate your patronage and patience during this upgrade and look forward to continuing to serve you in the future.

## PORT OF EDMONDS TENANT REWARD

Purchase fuel from the Port of Edmonds fuel dock during the month of December 2016 or January 2017 and provide receipt as proof of purchase and receive:

**1 free boat show ticket** for 20 gallons purchased

**2 free boat show tickets** for 40 gallons or more

Maximum 2 tickets per customer.

## MARINA SYSTEMS FREEZE PROTECTION

During low temperature spells, the Port of Edmonds implements various methods of freeze protection for water systems throughout our facilities. Some of the potable water systems have automatic freeze valves that open wider as the temperature drops lower and during very cold temperatures, water will be running full force to prevent damage to the pipes. Other areas of the marina do not have these systems and Port staff may disconnect hoses and turn the water at the end of the dock on. If temperatures are predicted to be very low for extended periods of time, the pipes in some locations will be completely blown out and shut down to avoid damage.

Port staff will usually post the gate on your dock with signage explaining that freeze protection is in place or water has been shut off. So when you see a running faucet during freezing temperatures – don't shut it off. Also, during the winter time, it is a good practice to disconnect your hose from the faucet when it is not being used. Check with the marina office if you have questions.

## VESSEL SAFETY CHECKS

Mitigate damage to your boat and others and assist with insuring that Port facilities and your vessel sustain the least amount of damage during the winter storms.

**Check and replace lines.** They don't last forever, and this can be simple assurance that your vessel will remain secure.

**Are you using a heater aboard?** This can be very dangerous. Consider purchasing some type of moisture absorber or dehumidifier instead. They collect water absorbed from the air and create airflow that achieves the same and maybe better results than a heater and/or light that is left on. They eliminate musty odors, reduce allergens that can trigger asthma and cause irritation to skin and eyes. Most are very energy efficient and may keep your maintenance costs down.

**Feeling some holiday spirit?** Only marine grade electrical cords with locking rings in place at both ends are permitted. Temporary wiring such as Christmas lights can cause problems if they are not wired properly and specified for outdoor use.

### 20% OFF TRAVELIFT + PROGRESSIVE DISCOUNTS ON BOATYARD LAY DAYS
